

**SUMMARY OF REASONS
FOR REVISIONS TO
ALABAMA STATE IMPLEMENTATION PLAN**

The proposed revisions to the Alabama SIP address prongs 1 and 2 of element D of the 2015 Ozone Infrastructure State Implementation Plan (I-SIP), and withdraws a previous submittal of the same, sent to EPA on August 20, 2018. These changes are in response to EPA's recognition that states may be able to establish alternative approaches to addressing their interstate transport obligations for the 2015 8-hour ozone NAAQS that may vary from a nationally uniform framework, once those alternative approaches are technically justified and appropriate.
