

# **Announcement**

## **2012 Diesel Emissions Reduction Act (DERA)**

### **Diesel Emissions Reduction Grant Program**

**Grant Amount: \$116,000**

The DERA program provides public and/or private on-road and off-road diesel fleet owners and operators funding to help reduce diesel emissions within the State of Alabama. Reducing diesel emissions, such as carbon monoxide, hydrocarbons and particulate matter will help improve air quality and human health in Alabama. We would like to partner with fleet owners/managers to retrofit older diesel engines with diesel emissions control devices and/or anti-Idling systems.

#### **Diesel Emissions Control Devices and Anti-Idling Systems Used in Previous Projects:**

Diesel Oxidation Catalysts (DOC)

Closed Crankcase Ventilation (CCV)

ZTR Smartstart II (Locomotive Anti-idling System)

All devices and systems must be EPA/CARB-certified.

Entities awarded funding under this program must secure vendors and contractors through a competitive bidding process required by the U.S. EPA and the State of Alabama.
